

Course Project general Guideline:

1. This is a group work project. Each group consists of FIVE to SIX students. Each member should cover 2 pages of the project.
2. Project should be realistic, complete, connected and is of advanced level (not just simple demo examples).
3. Project must implement multiple themes. Each theme has its own layout and colors set. Layout means the positioning of different pages elements (Check https://www.w3schools.com/css/css_intro.asp).
4. Project should cover all what you have learnt. The following list contains just possible ideas and guidelines.
 - Headings - Paragraphs - Formatting - Entities.
 - Links with CSS Customization.
 - Image Links with captions.
 - Images and Image Maps, when applicable.
 - Icons.
 - Tables with CSS Customization.
 - Advanced Tables.
 - Nesting other elements in Tables.
 - Videos / Audios.
 - Login Forms.
 - User Profile/Registration Forms.
 - Complaints/Feedback Forms.
 - Search with Paged Search Results (with List View layout, Grid View layout, and Details layout).
 - CSS Style Sheets.
 - CSS Transformations, Translations, Transitions.
 - Website Multiple Themes (different colors/different layout... Check https://www.w3schools.com/css/css_intro.asp)
 - Javascript DynamicLogic (i.e. Show/Hide Elements, Add/Remove/Change attributes /elements, etc.)
 - Javascript custom validation (showing custom HTML messages rather than HTML5 Built-in Validation).
 - **Additional Requirements**
 - All code must be clean and organized
 - Include comments explaining complex parts
 - The project must work without errors
 - the website must be responsive and it's webpages must be connected to each other

5. Project Ideas just list possible modules/functions per project. You need as a team to brainstorm more functions regarding your project to show creativity and novelty.
6. Note that each idea has ~20 suggested pages could be made, you can use it or generate them on your own.
